What is this product?

Type: Shares of a Sub-Fund of CPR Invest, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.
Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.
Objectives: The Compartment's objective is to achieve a positive return in all types of market conditions over the recommended holding period (at least two years) through a discretionary and flexible management approach by exposing the Compartment to various international bond, money market and equity markets, either through direct investment or through investments in UCIs.

The allocation of assets is built on the basis of the team's projections on the various markets and according to the level of risk presented by each asset class.

To achieve this, the allocation is mainly made through an active selection of UCIs, and/or securities (bonds, money-market instruments, and equities). Investment vehicles incorporating an Environmental, Social and Governance approach will be preferred and will always represent a majority of the Compartment's net assets.
The best-in-class approach does not exclude any sector of activity in principle. All economic sectors are therefore represented in this approach and the Compartment may therefore be exposed to some controversial sectors.

The Compartment equity exposure will be between - 10% and 35% of its assets. The investment in equity will have a thematic focus by seeking to benefit from economic, social, demographic, technological, regulatory or environmental structural shifts such as Ageing population, Education, Climate Action, Food challenge, Well-Being and Lifestyles, Disruption...
The interest rate modified duration of the Compartment will range from -3 to +8.
The Compartment's exposure to instruments classed as "'Speculative Grade" shall not exceed 40% of its assets.
The Compartment is invested up to 35% of its assets in equity funds or equities of any country without constraints of capitalisation. The Compartment is invested for at least 65% of its assets in bond and money market products of any country.
Derivative instruments will be used for hedging, exposure purposes and efficient portfolio management.

The Compartment is actively managed. The Compartment may use a Benchmark a posteriori as an indicator for assessing the Compartment's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

The Compartment is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the CPR Invest prospectus.

Distribution Policy: As this is a non-distributing share class, investment income is reinvested.

What are the risks and what could I get in return?

RISK INDICATOR

Lower Risk — Higher Risk

The risk indicator assumes you keep the product for 2 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.
Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the CPR Invest prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What happens if CPR Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of CPR Invest. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 invested.

Investment EUR 10,000		
Scenarios	**If you exit after**	
	1 year	**2 years***
Total Costs	€599	€711
Annual Cost Impact**	6.0%	3.7%

* Recommended holding period.
** This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.93% before costs and 0.25% after costs.
These figures include the maximum distribution fee that the person selling you the product may charge (5.00% of amount invested / 500 EUR). This person will inform you of the actual distribution fee.
If you are invested in this product as part of an insurance contract, the costs shown do not include additional costs that you could potentially bear.

COMPOSITION OF COSTS

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	This includes distribution costs of 5.00% of amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to 500 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0.00 EUR
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.92% of the value of your investment per year. This percentage is based on actual costs over the last year.	86.93 EUR
Transaction costs	0.13% of the value of your investment per year. This is an estimate of the cost of buying and selling the underlying investments for the product. The actual amount depends on how much we buy and sell.	12.57 EUR
