What is this product?

Type: Shares of a Sub-Fund of CPR Invest, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: This Sub-Fund matures on 30/04/2027. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The investment objective is to achieve income and capital appreciation over the recommended holding period (at least 3 years) by building a "buy and watch" diversified credit portfolio consisting of best-positioned companies to tackle climate change, while integrating Environmental, Social and Governance (ESG) criteria in the investment process.

To achieve this, the Compartment aims to select securities of companies that are most virtuous according to CDP's assessment standards. The investment universe is made up of at least 90% of companies with a CDP score. At least 90% of portfolio securities are rated by the CDP and have an ESG score.

The Management Company integrates an ESG approach by excluding companies based on the following:

- the lowest Amundi overall ESG scores (i.e., F and G on a scale from A to G);
- the lowest scores (i.e., F and G on a scale from A to G) on the Environmental component of Amundi's overall ESG scores ;
- ESG controversies deemed to be severe.

The Compartment seeks to achieve an ESG score of its portfolio greater than the ESG score of 60% ICE BofA 1-5 Year Global Corporate Hedged Index + 40% ICE BofA Global High Yield Index Hedged.

In addition, while the Compartment excludes companies deemed not compatible with the objective of the Paris Climate Agreement to limit global warming bonds, however, it can invest in these companies when they issue green, social and sustainability bonds, provided that the projects financed by those issuers are aligned with the above-mentioned exclusions. As an exception to this, the exclusion of companies found in violation of the UNGC principles or the OECD Guidelines for Multinational Enterprises will be applied at the level of the issuers.

The Compartment is mainly invested in Euro and US dollar-denominated bonds (including green bonds) issued by public (government, supranational, local/international public bodies) and private issuers.

The Compartment invests at least 50% in securities rated "Investment Grade".

The Compartment can be invested up to 50% of its assets in securities rated "Speculative Grade".

The Compartment's investments may include, but are not limited to, subordinated bonds, senior bonds, preferred securities and perpetual bonds (within a limit of 25% of its assets for perpetual bonds). The Compartment may invest up to 25% in corporate hybrid bonds.

The Compartment is managed within a range of modified duration between [0; +3].

The Compartment may also invest up to 10% of its assets in emerging markets.

Derivative instruments will be used for hedging, arbitrage, exposure purposes and efficient portfolio management.

The Compartment is actively managed and is not managed in reference to a benchmark.

The Compartment is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment and to receive income over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the CPR Invest prospectus.

Distribution Policy: As this is a distributing share class, investment income is distributed.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product until 30/04/2027. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the CPR Invest prospectus.

What happens if CPR Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of CPR Invest. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME
