|---|---|---|---|---|---|---|

Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

## KEY FIGURES *(Source: Amundi Group)*

**Net Asset Value (NAV) :** 180.99 ( CHF )
**Assets Under Management (AUM) :**
2,374.76 ( million CHF )
**Last coupon :** -

## KEY PEOPLE *(Source: Amundi Group)*

**Management company :** CPR ASSET MANAGEMENT
**Custodian / Administrator :**
CACEIS Bank, Luxembourg Branch / CACEIS Fund Administration Luxembourg

## OPERATION & FEES *(Source: Amundi Group)*

**Frequency of NAV calculation :** Daily
**Order cut-off time :** 2pm CET
**Execution NAV :** D
**Subscription Value Date / Redemption Date :**
D+2 / D+2
**Minimum initial subscription :**
1 Ten-Thousandth of Share(s)/Equitie(s)
**Minimum subsequent subscription :**
1 Ten-Thousandth of Share(s)/Equitie(s)
**Subscription fee (max) / Redemption fee :**
5.00% / 0.00%
**Management fees and other administrative or operating costs :**
2.30%
**Performance fees :** Yes

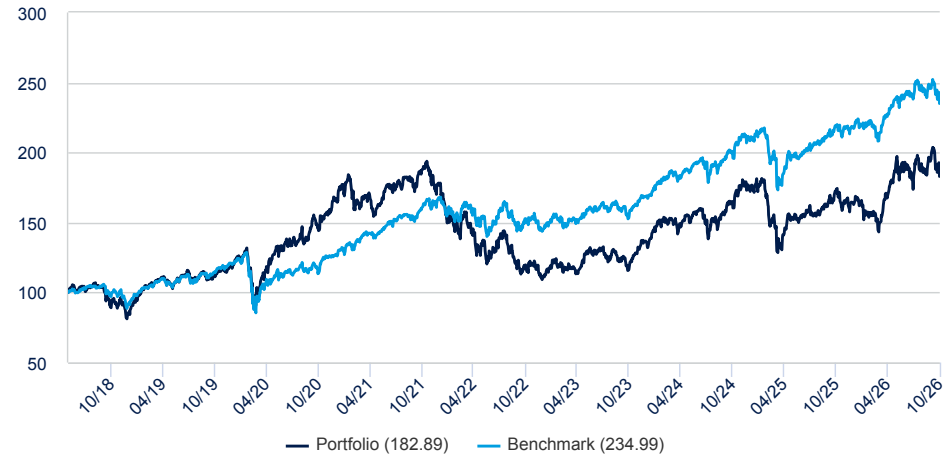

All details are available in the legal documentation

## INVESTMENT STRATEGY *(Source: Amundi Group)*

The investment objective is to outperform global equity markets over a long-term period (minimum of five years) by investing in shares of companies which either establish or benefit - fully or partly - from disruptive business models.

## MANAGER'S COMMENT

The month of October 2026 was marked by a new surge in energy prices. Indeed, attacks on ships continued in the Strait of Hormuz, the Houthis claimed responsibility for strikes against several Saudi refineries, and Donald Trump hinted that US strikes on Iran could resume after the midterm elections on November 3. As a result, the price of Brent crude rose by nearly 14% over the month, reaching $118, its highest level in six months. The price of natural gas also increased sharply, reaching its highest level since the end of 2022. Another key event of the month was the sharp decline in technology stocks at the very end of the month, following disappointing earnings reports from Alphabet, Amazon, and Intel, which reignited doubts about the profitability of massive investments in AI.

The inflation indices published in October, covering the month of September, accelerated again due to energy prices. In the eurozone, headline inflation reached 3.8% compared to 3.2% in August, its highest level since September 2023, with the energy component rising by 18.8% year-on-year. In contrast, core inflation remained broadly stable at 2.5%. In the United States, headline inflation (CPI) rose from 3.4% to 3.7%, while core inflation climbed to 2.6%, slightly more than expected. The September “core PCE” inflation came in at 3.1%.

Activity indicators continued to be solid. In the United States, GDP growth in Q3 came in at 3.4% quarter-on-quarter annualized, above expectations, driven by consumption and business investment. However, after a strong report in August, the September employment report disappointed, with only 29,000 non-farm jobs created and an increase in the unemployment rate to 4.2%. In the eurozone, GDP grew by 0.4% in Q3, despite a surprise contraction of 0.1% in France, but the composite PMI fell to 51.9 in October, from 53.1 in September, well below expectations. In China, GDP growth came in at 4.5% year-on-year in Q3, but the economy remains highly unbalanced and household consumption very weak.

After September, the first month in history during which the ECB, the Fed, and the BoJ all raised their key rates, these three central banks all decided to leave their rates unchanged in October. The Fed maintained the fed funds target range at 3.75/4%, but two FOMC members (Lisa Cook and Beth Hammack) voted in favor of another hike. Kevin Warsh indicated that the September rate hike had begun to take effect and that the tightening of financial conditions was paving the way for a more sustainable period of growth and price stability. For its part, the BoJ left its main policy rate at 1.25% but opened the door to a hike in December. Finally, the ECB left its deposit rate at 2.50%, even though energy prices in Europe are now between the “adverse” and “severe” scenarios mentioned in September, fueling upside risks for inflation and downside risks for growth. The Council debated a new rate hike but judged that uncertainties were still too high, while indicating that “the direction is quite clear” for all its members. For now, it does not see a substantial risk of second-round effects.

Despite the rise in oil prices, bond yields fell sharply over the month, benefiting from a flight to safe-haven assets at the end of the month and the central banks’ pause. The US 10-year yield fell by nearly 40 bps to 4.90%, after briefly exceeding 5.30% during the month. The German 10-year yield fell by about 25 bps over the month to 3.29%, returning to its end-August levels. In Japan, the 10-year yield fell back below the 3% mark, to 2.77%, its lowest level in nearly three months. Finally, gold fell again, by about 6% over the month, to just over $3,875 an ounce, penalized by the prospect of further Fed rate hikes.

Equity markets were shaken at the end of the month by doubts about the profitability of AI-related investments. The S&P 500 fell by 0.9% over the month and the Nasdaq by more than 5%, while the Dow Jones rose by 1.7%. The Eurostoxx 600 was more resilient, with an increase of 1.9%. Asian markets, more exposed to the semiconductor sector, fell sharply: the Nikkei lost nearly 5.2% and the MSCI Emerging dropped 8.1%, its worst month since the start of the war in Iran.

## AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

**ESG Investment Universe:** 100% MSCI WORLD GROWTH INDEX

**Investment Portfolio Score:** 0.01

**ESG Investment Universe Score[1]:** -0.25

## ESG Coverage (source: Amundi) *

| | Portfolio | ESG Investment Universe |
|---|---|---|
| **Percentage with an Amundi ESG rating [2]** | 99.99% | 100.00% |
| **Percentage that can have an ESG rating [3]** | 99.84% | 100.00% |

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

## ESG Terminology

### ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

### ESG Rating

**The issuer's ESG rating:** each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
**ESG rating of the investment universe and the portfolio:** the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

### Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

## Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
