Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

INVESTMENT STRATEGY *(Source: Amundi Group)*

The compartment's investment objective is to outperform global equity markets over a minimum five-year investment horizon by investing in international equities involved in the entire food value chain (agriculture, forest, water, food and beverage production and distribution, restaurants and all related activities). The investment process takes into account a sustainable approach by excluding certain companies with high Environmental Social and Governance controversies.

TEAM MANAGEMENT

Stéphane Soussan

Portfolio Manager

Anne Le Borgne

Co-Portfolio Manager

MANAGER'S COMMENT

September 2026 was marked by the return of major central banks to monetary tightening: within the space of a week, the ECB, the Fed, and the BoJ all raised their key interest rates by 25 basis points, which is a first for these three central banks in the same month. This move occurred in a context of high energy prices. Indeed, the conflict between Iran and the United States intensified again at the beginning of the month, with attacks on both sides against ships near the Strait of Hormuz. Brent crude oil thus crossed back above the $100 mark on September 9, for the first time since July, before retreating slightly to end the month up 16% at $104.

Bond yields rose sharply over the month, due to the combined effect of rising oil prices and monetary tightening. The US 10-year yield gained about 50 basis points over the month, ending around 5.28%, its highest level since 2007. The German 10-year yield rose about 25 basis points to 3.55%, after reaching its highest level since 2009. In Japan, the 10-year yield crossed the 3% mark for the first time since 1996, finishing the month at 3.02%. Finally, gold was penalized by rising real interest rates and lost about 6% over the month, erasing much of its August gains.

Equity markets stalled in September, penalized by the rise in long-term rates. The S&P 500 ended the month roughly unchanged (down about 0.8%), while the financial sector significantly underperformed (down 7.3% over the month, its worst monthly performance since March 2023). The Eurostoxx 600 fell by 2.5%, marking its first monthly decline in six months. The Nikkei rose 0.7% over the month but recorded its first quarterly decline since early 2025. Finally, the MSCI Emerging Markets index slightly declined (down 0.8%), notably penalized by the Korean and Chinese markets.

Food for Generations declined over the month. The Water and Waste sector remained stable thanks to the strong rise of life-science tool manufacturers such as Agilent and Thermo Fisher, offset by declines in industrial stocks like Pentair and utilities (American Water Works). The Food Retail sector was penalized by declines in US Foods and Sysco, two companies supplying restaurants, mainly in the United States. The Agriculture sector declined in a context of a slight drop in grain prices after several months of significant increases. Agricultural machinery ended the month up (Deere, CNH Industrial) thanks to a rebound in demand, but fertilizers (Mosaic) and agricultural services (Bunge) fell significantly. Food Products fell sharply (Danone, Novonesis, Glanbia) amid pressure on demand and margins for American companies. The Restaurant sector also fell sharply (Darden), particularly in the United States, probably due to pressure on consumers' purchasing power.

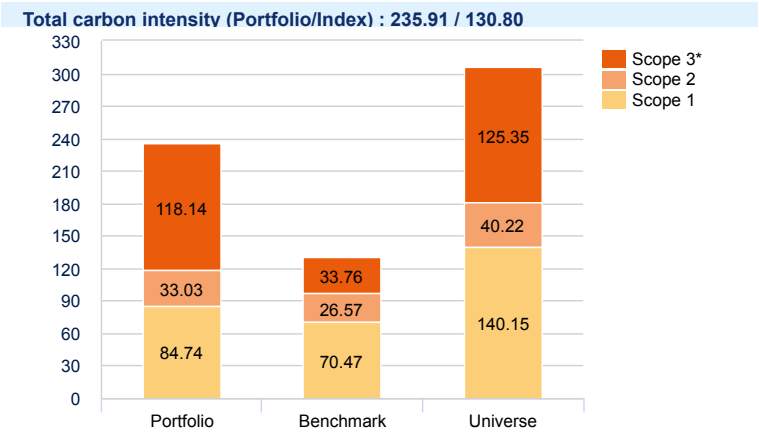

In Food Products, we favor ingredient companies that maintain strong sales momentum as well as producers outside the United States, as the U.S. market remains challenging. In Agriculture, salmon farming should benefit from a rise in selling prices in 2026. While salmon production increased significantly in 2025, its growth is expected to be very limited in 2026, supporting the rise in selling prices. The agricultural machinery market has been declining since 2023. After several months of production decline, inventory levels have normalized. The market has therefore stabilized and should reach its bottom in 2026. The European market is even expected to rebound as early as 2026. This should support this segment in the stock market. In the Water and Waste sector, our main positions are in water treatment companies that should benefit from the need to modernize water networks and improve water quality and recycling.

EQUITY 30/09/2026

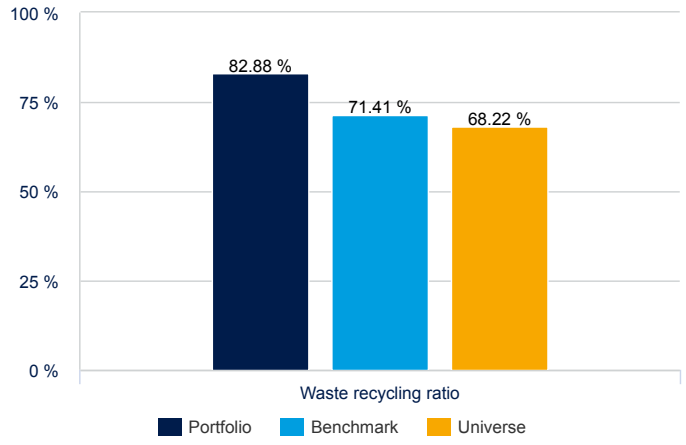

PORTFOLIO IMPACT REPORT

CARBON INTENSITY

This indicator measures the average emissions in metric tonnes of carbon equivalent per company's revenue. This is an indicator of the carbon intensity of the value chain of the companies in the portfolio..

WASTE RECYCLING RATIO

This indicator measures the ratio of recycled waste over total produced waste.

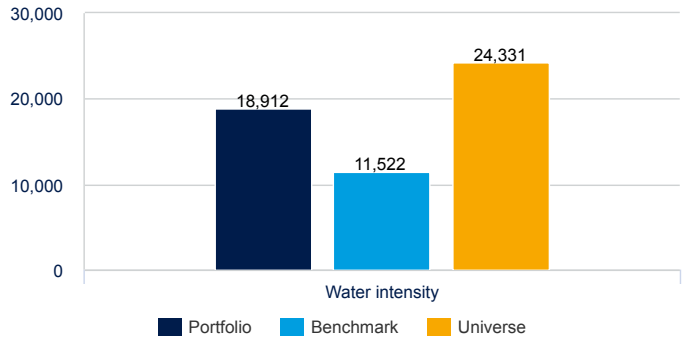

DATA COVERAGE

	Portfolio	Benchmark
Coverage rate	100%	99.17%

	Portfolio	Benchmark	Universe
Waste recycling ratio	82.88%	71.41%	68.22%
Water Withdrawal Intensity	94.78%	84.81%	86.35%

This measurement corresponds to the portion of private issuers for which we have environmental data as a percentage of all private issuers.

WATER INTENSITY

This indicator measures the portfolio's total water withdrawal in cubic meters divided by net sales in EUR. This is an indicator of the water intensity generated by the companies in this portfolio

Sources and definitions

The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO2e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO2 equivalent

Definition of scopes:
- Scope 1 : all emissions that arise directly from sources that are owned or controlled by the company.
- Scope 2 : all indirect emissions generated by the purchase or production of electricity, steam or heat.
- Scope 3 : all other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3
- Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

ESG Investment Universe: 100% INDEX CPR EQT FOOD

Investment Portfolio Score: 0.68

ESG Investment Universe Score[1]: 0.19

ESG Coverage (source: Amundi) *

	Portfolio	ESG Investment Universe
Percentage with an Amundi ESG rating [2]	100.00%	99.70%
Percentage that can have an ESG rating [3]	99.18%	100.00%

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).

SRI Terminology

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

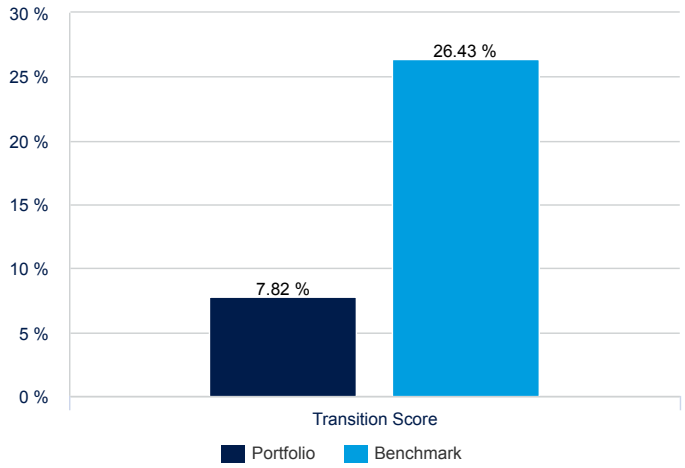

ENVIRONMENT:Carbon intensity

GHG intensity of investee companies – tCO2eq/€m de revenus
Source : Trucost

Coverage rate (Portfolio/Benchmark)	100%	98.80%

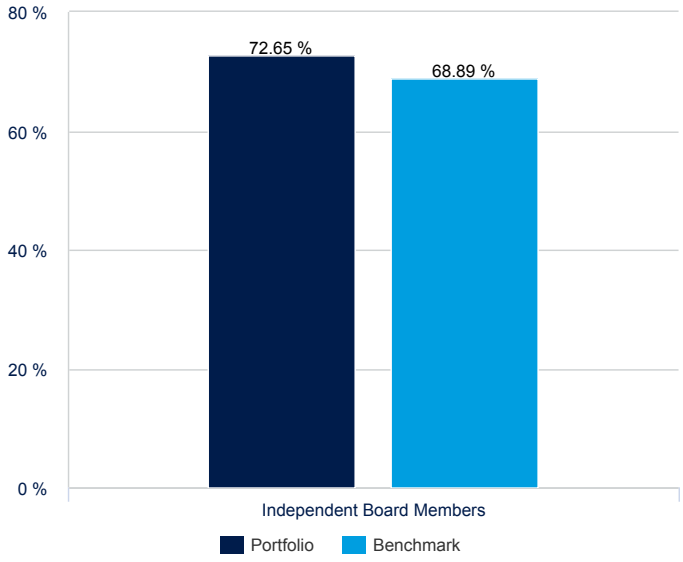

ENVIRONMENT:Investments in companies without carbon emissions reduction initiatives (%)

GOVERNANCE:Independent board members

Coverage rate (Portfolio/Benchmark)	100%	99.40%

RESPECT FOR HUMAN RIGHTS: decent work and freedom of association

Coverage rate (Portfolio/Benchmark)	100%	99.40%

Sources and definitions

Carbon Intensity:PAI 3 measures carbon emissions expressed in million euros (€ million) of revenue. The Greenhouse Gas intensity of the relevant portfolio is determined by calculating the portfolio weighted average of the total greenhouse gas emissions intensity per million euros of sales of the companies in the portfolio (t/EUR million sales).

Amundi relies on the data provider S&P-Trucost, whose methodology is based on the Greenhouse Gas Protocol:
Scope 1: Direct emissions generated by resources owned or controlled by the company.
Scope 2: Indirect emissions generated by the purchase or production of electricity, steam, or heat.
Scope 3: All other indirect emissions, both upstream and downstream of the value chain. For data robustness reasons, we have chosen to use emissions from upstream Scope 3 activities.

Investments in companies that have not taken initiatives to reduce their carbon emissions:The extent of investments in companies without carbon emissions reduction initiatives in the relevant portfolio is assessed by calculating the sum of the weights of these companies in the relevant portfolio that don't have submitted Science-Based Target (SBT) or CDP target. The PAI indicator uses the ""relevant"" approach, meaning that the denominator is determined by considering the relevant portfolio. The weights of the portfolio are adjusted to account for incomplete data coverage.

Independent board members:Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

Human rights policy:Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv"
