Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

## KEY FIGURES *(Source: Amundi Group)*

## MANAGER'S COMMENT

October 2026 was dominated by the surge in energy prices amid tensions in the Middle East. Brent crude rose by nearly 14% to USD 118, while natural gas returned to its highest level since 2022.
This increase reignited inflationary pressures, with inflation reaching 3.8% in the eurozone and 3.7% in the United States. Nevertheless, economic activity remained resilient, with annualised growth of 3.4% in the United States and quarter-on-quarter growth of 0.4% in the eurozone, despite a slowdown in the US labour market and weaker European economic indicators.
The Federal Reserve, the European Central Bank and the Bank of Japan kept their policy rates unchanged while maintaining a restrictive bias. Bond yields declined amid safe-haven buying.
In financial markets, concerns about the profitability of artificial intelligence investments weighed on the technology sector, with the Nasdaq falling by more than 5%. The S&P 500 declined by 0.9%, while the Dow Jones and the STOXX Europe 600 advanced.
Investors rotated into energy (+14%) and defensive sectors, particularly consumer staples (+13%) and healthcare (+12%), at the expense of communication services (-12%) and technology (-5%).
Against this backdrop, the fund declined by 1.3%—A share class, net of fees—compared with a 0.9% increase for the MSCI World Index, resulting in underperformance of 2.2 percentage points.
The lack of exposure to the healthcare and energy sectors accounted for almost half of the fund's underperformance.
Other sectors that weighed on relative performance included:

- **Financials**, and US banks in particular, were penalised by weakness in their markets businesses. Stock selection also had a negative impact, notably Banco Santander (-17%). The shares were affected by concerns that a sustained increase in interest rates could raise deposit costs and slow demand for credit, as well as by political uncertainty in Brazil.
- **Technology** also weighed on relative performance, with Dell (-19%) and Samsung Electronics (-13%) declining alongside the semiconductor sector.

Conversely, the overweight position in consumer staples made a positive contribution, supported by our holdings in Costco (+13%), Walmart (+20%), AB InBev (+10%), Danone (+12%) and L'Oréal (+16%).
The consumer discretionary sector benefited from the resilience of US household spending. Retail sales rose by 6.3% year on year in September, following increases of 5.6% in August and 4.5% in July. This momentum contrasted sharply with Europe, where retail sales stagnated.
This environment supported the travel segment, which lies at the heart of the fund's strategy. Hyatt (+16%) benefited from an 8% increase in revenue per available room in the third quarter. Cruise operators Viking (+14%) and Royal Caribbean (+17.5%) outperformed, supported by a strong passenger revenue outlook for the coming quarter and healthy booking momentum for 2027.
By contrast, within the luxury sector, Richemont (-4.4%) was penalised by slowing third-quarter sales amid a persistently challenging economic environment in China.

**Portfolio activity**

In early October, we reduced our exposure to selected technology stocks in order to increase our positions in the hyperscalers Amazon and Alphabet.
We also added to our position in Viking following its recent underperformance, which was driven by concerns over potential cruise cancellations due to below-average river water levels.

**Outlook**

The market decline reflects uncertainty surrounding artificial intelligence-related investment. This is primarily a 2028–2029 issue and does not call the 2027 growth outlook into question.
Valuations have now become more attractive in certain market segments, particularly among hyperscalers such as Amazon and Alphabet, which have a strong ability to monetise their infrastructure.
Furthermore, any easing in oil prices would support momentum in the travel sector, while lower interest rates would benefit neglected housing-related segments.

## AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

**ESG Investment Universe:** 100% INDICE_CPR_EQT_LIFESTYLE

**Investment Portfolio Score:** -0.10

**ESG Investment Universe Score[1]:** -0.25

## ESG Coverage (source: Amundi) *

| | Portfolio | ESG Investment Universe |
|---|---|---|
| **Percentage with an Amundi ESG rating [2]** | 100.00% | 99.98% |
| **Percentage that can have an ESG rating [3]** | 99.60% | 100.00% |

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

## ESG Terminology

### ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

### ESG Rating

**The issuer's ESG rating:** each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
**ESG rating of the investment universe and the portfolio:** the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

### Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

## Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
