Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

## KEY FIGURES *(Source: Amundi Group)*

**Net Asset Value (NAV) :** 207.01 ( EUR )

## MANAGER'S COMMENT

October 2026 was marked by a new surge in energy prices. Indeed, attacks on ships continued in the Strait of Hormuz, the Houthis claimed strikes against several Saudi refineries, and Donald Trump hinted that U.S. strikes on Iran could resume after the November 3 midterm elections.

The month revealed a marked divergence in natural resources.
Energy was the big winner, with crude oil rising by 12 to 15% and energy stocks posting double-digit gains as the Middle East conflict intensified and major oil companies recorded record profits.
Metals and mining suffered heavy losses — gold fell below $4,000/oz, silver dropped nearly 20%, and lithium stocks declined sharply — despite the relative resilience of copper amid record Chinese import demand and a historic collapse in Chilean supply.
Agricultural products were the weakest pillar, with grains down 10 to 12% following a downward revision of stocks by the USDA, although sugar bucked the trend due to deficit fears linked to El Niño.

Mergers and acquisitions activity was most intense in energy (led by EQT/Range Resources at $12.8 billion) and metals (consolidation in copper and critical minerals), reflecting strategic positioning around supply security and the energy transition.

In this environment, the natural resources theme overall performed well, outperforming global equities. While the energy segment clearly stood out with gains, metals and mining paid the heaviest price. As for agriculture, it ranked mid-table, notably thanks to the greater resilience of the paper and wood industry.

In this context, the fund recorded a negative performance, contrasting with that of its benchmark index. Materials were the main detractor from performance, through industrial miners including diversified ones (Ivanhoe Mines, Osisko Metals, Hudbay Minerals, NGEX Minerals), copper producers (Ero Copper), aluminum, and also the gold sector. The sharp decline in lithium producers (Albemarle, SQM) and the underexposure to the paper sector, which proved more resilient, also weighed on performance. The energy sector also contributed negatively, through the uranium sector (Cameco, Nexgen Energy) and oil services. Conversely, the steel sector (Nucor) and integrated oil companies contributed positively.

Regarding portfolio management, we participated in the IPO of ABT Tungsten, which is developing a very promising project in Spain. In the gold sector, another stock was added to the portfolio: Equinox Gold, the second-largest gold producer in Canada, whose valuation is very attractive. First Quantum, whose reopening of the Cobre Panama mine could be announced soon, was also strengthened. Conversely, one stock was removed from the portfolio: Neste OYJ after a strong appreciation and more uncertain prospects. Furthermore, the main reductions concerned Wheaton Precious Metals, Agnico Eagle, Newmont, and Franco Nevada in precious metals; ExxonMobil, ENI SPA among integrated oil companies; Marathon Petroleum and Valero Energy in refining.

## AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

**ESG Investment Universe:** 33.33% MSCI World Index / Energy -IG + 33.34% NYSE ARCA GOLD MINERS INDEX + 33.33% MSCI World Index / Materials -IG

**Investment Portfolio Score:** 0.04

**ESG Investment Universe Score[1]:** -0.07

## ESG Coverage (source: Amundi) *

| | Portfolio | ESG Investment Universe |
|---|---|---|
| **Percentage with an Amundi ESG rating [2]** | 90.73% | 99.02% |
| **Percentage that can have an ESG rating [3]** | 99.52% | 99.75% |

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

## ESG Terminology

### ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

### ESG Rating

**The issuer's ESG rating:** each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
**ESG rating of the investment universe and the portfolio:** the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

### Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

## Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
