Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

KEY FIGURES *(Source: Amundi Group)*

Net Asset Value (NAV) : 203.39 (USD)
Assets Under Management (AUM) :
1,146.47 (million USD)
Last coupon : -

KEY PEOPLE *(Source: Amundi Group)*

Management company : CPR ASSET MANAGEMENT

OPERATION & FEES *(Source: Amundi Group)*

Frequency of NAV calculation : Daily
Minimum initial subscription :
1 Ten-Thousandth of Share(s)/Equitie(s)
Minimum subsequent subscription :
1 Ten-Thousandth of Share(s)/Equitie(s)
Subscription fee (max) : 5.00%
Redemption fee : 0.00%
Management fees and other administrative or operating costs :
2.00%
Performance fees : Yes

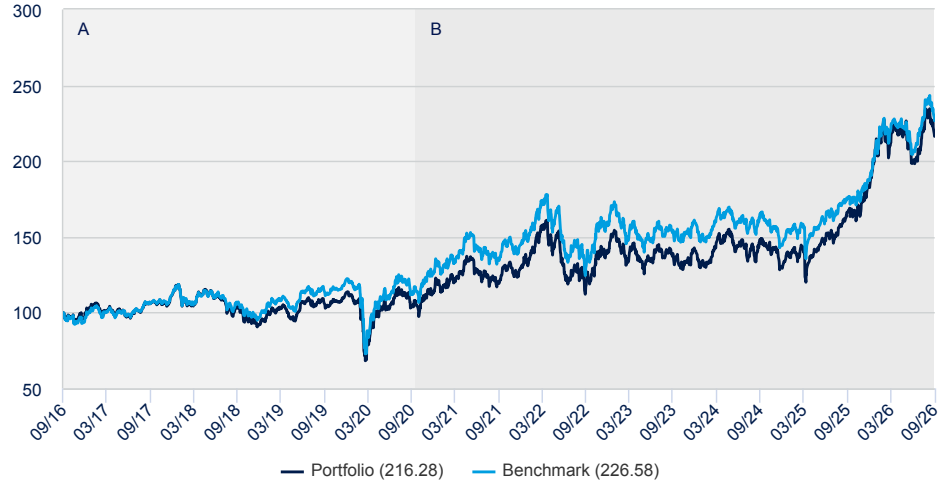
All details are available in the legal documentation

INVESTMENT STRATEGY *(Source: Amundi Group)*

The Compartment's objective is to outperform (after applicable fees) over a long-term period (minimum 5 years), the S&P Global Natural Resources Index by investing in international equities mainly involved in the energy, gold and materials activities.

ANALYSIS OF THE NET PERFORMANCE *(Source: Fund Admin)*

CHANGE IN NET ASSET VALUE BASE 100 *(Source: Fund Admin)*



A : Simulation based on the performance from inception to Oct 15, 2020 of AF - CPR Global Resources - AU (C) absorbed by CPR Invest - Global Resources - A USD - Acc on Oct 16, 2020. CPR Invest - Global Resources - A USD - Acc has adopted a fee structure with the same total ongoing charges than those of AF - CPR Global Resources - AU (C) estimated at the merger date Oct 16, 2020.
B : Performance of CPR Invest - Global Resources - A USD - Acc since its launch date.

MANAGER'S COMMENT

September 2026 was marked by the return of major central banks to monetary tightening: within the space of a week, the ECB, the Fed, and the BoJ all raised their key interest rates by 25 basis points, which is a first for these three central banks in the same month. This move occurred in a context of high energy prices. Indeed, the conflict between Iran and the United States intensified again at the beginning of the month, with attacks on both sides against ships near the Strait of Hormuz.

The materials sector faced several simultaneous headwinds. Gold fell sharply as there was a significant rise in the US 10-year real interest rates of almost 50 basis points and a 2% appreciation of the US dollar against major currencies. Gold producers were heavily sold in September. Copper experienced a volatile month: prices reached a record high at the beginning of the month due to tight supply and tariff expectations, which supported copper stocks, but then fell sharply on September 10 after Reuters reported that the White House had blocked tariffs on refined copper due to concerns about affordability. Lithium stocks were the most affected subsector, penalized by persistent concerns of oversupply and declining political support in China. Fertilizer stocks were impacted by Trump's announcement of a potential potash deal with Belarus.

The energy sector was divided between refiners and upstream/oilfield services. Retail diesel prices in the United States climbed to record levels above $6.50 per gallon, driven by the ongoing war between the United States and Iran disrupting flows through the Strait of Hormuz and Ukrainian strikes on Russian refineries. This created a strong tailwind for refining margins — the ultra-low sulfur diesel margin reportedly reached about $106 per barrel — which significantly boosted profits and refining stocks until mid-month. However, the rally stopped in the last two weeks, with reports that the Trump administration was preparing a 90-day diesel export ban, triggering massive one-day sell-offs in refiner stocks. Oilfield services and the uranium/nuclear sectors significantly underperformed. Companies exposed to LNG benefited from the energy supply shock, with Shell's final investment decision (FID) on phase 2 of the LNG Canada project (doubling capacity to 28 mtpa) providing a catalyst at the end of the month.

In this environment, the natural resources theme posted a significantly negative performance, far worse than global equities. While the energy sector proved the most resilient, metals and mining were particularly affected. The agriculture sector ranked in the middle of the pack.

In this context, the fund recorded a markedly negative performance, underperforming its benchmark index. Materials were the main detractor from performance, notably through metals and mining including gold miners (Kinross Gold, Agnico Eagle), diversified miners (Solaris Resources, Nouveau Monde Graphite), lithium producers (Standard Lithium, Albemarle), and aluminum (Alcoa). The underexposure to the paper and wood industry, which proved more defensive, was also penalizing. The energy sector also contributed negatively through uranium (Cameco Corp, Nexgen Energy) and the overweight in oilfield services. Conversely, the refining sector and the absence of exposure to pure exploration/production stocks were beneficial.

Regarding portfolio management, a new stock was added to the portfolio: Energy Fuels, which develops uranium and rare earth projects in the United States. Furthermore, the main increases concerned the energy sector, through integrated oil companies Shell Plc, BP Plc, and Chevron Corp, oilfield services including Vallourec, and uranium via Nexgen Energy. Conversely, one stock was removed from the portfolio: Ingredion Inc, in favor of an increase in Bunge Global in agricultural products. Additionally, the main reductions concerned Gold Fields and Newmont Corp among gold miners, Ero Copper in copper, West Fraser in the wood industry, and Stee Dynamics in steel.

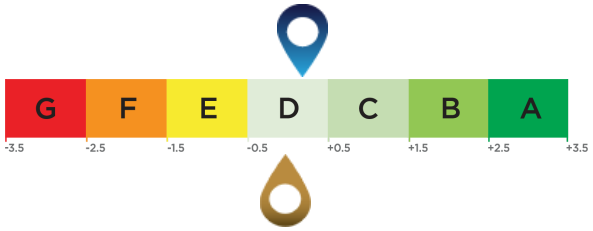
AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

ESG Investment Universe: 33.33% MSCI World Index / Energy -IG + 33.34% NYSE ARCA GOLD MINERS INDEX + 33.33% MSCI World Index / Materials -IG



Investment Portfolio Score: 0.16

ESG Investment Universe Score[1]: -0.04

ESG Coverage (source: Amundi) *

	Portfolio	ESG Investment Universe
Percentage with an Amundi ESG rating [2]	94.86%	98.45%
Percentage that can have an ESG rating [3]	99.11%	99.70%

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
