Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

KEY FIGURES *(Source: Amundi Group)*

Net Asset Value (NAV) : 130.37 (EUR)
Assets Under Management (AUM) :
557.74 (million EUR)
Last coupon : -

KEY PEOPLE *(Source: Amundi Group)*

Management company : CPR ASSET MANAGEMENT
Custodian / Administrator :
CACEIS Bank, Luxembourg Branch / CACEIS Fund Administration Luxembourg

OPERATION & FEES *(Source: Amundi Group)*

Frequency of NAV calculation : Daily
Order cut-off time : 2pm CET
Execution NAV : D
Subscription Value Date / Redemption Date :
D+2 / D+2
Minimum initial subscription :
1 Ten-Thousandth of Share(s)/Equitie(s)
Minimum subsequent subscription :
1 Ten-Thousandth of Share(s)/Equitie(s)
Subscription fee (max) / Redemption fee :
5.00% / 0.00%
Management fees and other administrative or operating costs :
1.96%
Performance fees : Yes

TEAM MANAGEMENT

Alexandre Cornu
Portfolio Manager

Gaël Des Prez de la Morlais
Portfolio Manager

MANAGER'S COMMENT

In October 2026, the MSCI World Index fell by 0.8%, a modest decline that nevertheless masks a historic sector rotation away from mega-cap technology stocks in favor of the real economy.
This downturn was fueled by growing doubts about the immediate profitability of artificial intelligence and by a major energy shock, with Brent crude surging 13.6% following tensions in the Strait of Hormuz. At the same time, uncertainty related to the U.S. midterm elections and persistent inflation in Europe (4.0%) kept central banks in a restrictive stance.
The impact varied greatly by sector: while technology and communication services suffered heavy losses, defensive stocks such as consumer staples (+14.7%) and healthcare (+12.9%), as well as the energy sector, significantly outperformed, reflecting a clear shift of capital toward more resilient assets.
In October 2026, CPR Invest - Hydrogen declined by -2.47%, compared to +0.08% for the MSCI ACWI, resulting in an underperformance of -2.6% over the period.

The underperformance came almost exclusively from industrials, which cost nearly -4% in relative performance in a market that abruptly shifted to risk-off mode. The stress that emerged among the most fragile players in the AI chain, illustrated by CoreWeave, revived doubts about financing costs, the actual pace of capex, and the sustainability of investment plans related to data centers. The entire “powering AI” chain was penalized, from Siemens Energy (-11%) to Eaton (-12%), Bloom Energy (-25%), Ceres Power (-34%). In China, competitive pressure and the end of certain tax advantages weighed on CATL (-18%) and Sungrow (-19%). Schneider Electric (-19%) was the main detractor after the announcement of the acquisition of PTC, deemed too expensive, dilutive, and a source of execution risk, even though its electrification activities remain very well oriented.

Conversely, utilities played their role as a buffer with a positive relative contribution of about +1%, supported by easing rates and their defensive profile, while the lack of exposure to several major declining technology and communication stocks partially offset the industrial decline.

In management, we first significantly reduced our position in Schneider Electric after the PTC announcement, before re-entering on the capital increase, as the entry point became attractive again in light of the fundamentals. We also increased our positions in Siemens Energy, Vertiv, and Nextpower, whose operational quality and exposure to electrical infrastructure remain at the core of our thesis. At the same time, DSV, Bureau Veritas, Ingersoll Rand, and partially Hitachi were strengthened to diversify the portfolio toward industrial profiles less directly correlated to the AI momentum.

We maintain a positive view on the fundamentals. Third-quarter reports confirmed the capacity shortfall among hyperscalers and strong order books at our main convictions. With valuations returning to their historical averages, we believe that the stress in October could mark a phase of crystallization rather than a questioning of the investment thesis on electrification, networks, and decentralized energy solutions.

AVERAGE ESG RATING (source : Amundi)

Environmental, Social and Governance rating. Information on sustainability-related aspects can be found at https://about.amundi.com/legal-documentation

ESG Investment Universe: 100% INDICE CPR EQT HYDROGEN

Investment Portfolio Score: 0.75

ESG Investment Universe Score[1]: 0.38

ESG Coverage (source: Amundi) *

	Portfolio	ESG Investment Universe
Percentage with an Amundi ESG rating [2]	100.00%	98.74%
Percentage that can have an ESG rating [3]	89.97%	100.00%

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
"E" for Environment (energy and gas consumption levels, water and waste management, etc.).
"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy[4], Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

[1] The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
[2] Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
[3] Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
[4] The updated document is available at https://www.amundi.com/int/ESG.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
