Objectives and Investment Policy (Source: Amundi) *

The investment objective is to outperform the MSCI ACWI IMI Artificial Intelligence Select Issuer Capped index over a long-term period (minimum of five years) by investing in international equities that contribute to or benefit from the development of artificial intelligence while integrating Environmental, Social and Governance (E, S, and G) criteria in the investment process.

To achieve this, the Compartment aims to select securities of companies exposed to the artificial intelligence sector and which can be grouped in the following categories:

- Artificial intelligence infrastructure: companies engaging in the physical infrastructure building required for the development of artificial intelligence;
- Artificial intelligence enablers: companies providing applications or services that enable artificial intelligence;
- Artificial intelligence adopters: companies that are adopting artificial intelligence technologies for their products and/or services.

The Compartment integrates Sustainability Factors in its investment process as outlined in more detail in section 4.9 of the prospectus.

The Compartment as a binding element aims to have a higher ESG score of its portfolio than that of the Reference Index.

The Compartment equity exposure will be between 75% and 120% of its assets.

The Compartment is invested for at least 75% of its assets in equity and equity equivalent securities of any country (including emerging countries) without constraints of capitalization. Among this proportion of 75% of its assets, the Compartment may invest in China A shares via Stock Connect within a maximum of 25% of its assets.

Derivative instruments will be used for hedging, arbitrage, exposure purposes and efficient portfolio management.

The Compartment is actively managed and seeks to outperform the benchmark – hedged, if relevant, between the currency of the share classes and the currency of the Compartment. The Compartment is mostly exposed to the issuers of the benchmark, however, the management of the Compartment is discretionary, and will invest in issuers not included in the benchmark.

The Compartment is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

// **NB: The capital and/or return is/are not guaranteed or protected.** The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned by the fund.

* This is a reference to the investment policy set out in the key information document.

Please refer to the Amundi Responsible Investment Policy and the CPR ASSET MANAGEMENT Sustainable Finance Disclosure Statement available at <https://cpram.com/fra/fr/particuliers/investissement-responsable/documentation-esg>.

The decision of the investor to invest in the promoted fund should take into account all the characteristics or objectives of the fund.

There is no guarantee that ESG considerations will enhance a fund's investment strategy or performance.

The fund promotes environmental or social characteristics, but does not have as its objective a sustainable investment.

Ein Schwellenland, eine aufstrebende Volkswirtschaft oder ein aufstrebender Markt ist ein Land, dessen Pro-Kopf-BIP niedriger ist als das der Industrieländer, das aber ein schnelles Wirtschaftswachstum erlebt.

Risk indicator (Source : Fund Admin)

Lower Risk Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the CPR Invest prospectus.

All investments involve risks and the value of investments can go up as well as down. The risk information contained in this document is intended to give an idea of the main and important risks associated with this fund. For further information on risks, please refer to the prospectus and the KIID available at:

All the performance data provided above is calculated based on the net asset value in the reference currency of the class (Euro), dividends reinvested. The returns and changes in net asset value indicated relate to past years and are not a reliable indicator of future returns. Performance is shown excluding the fees and commissions borne by the investor. The value of the investments may rise or fall according to market trends. Annual returns cover a full period of 12 months for each calendar year. For comparison purposes, the NAV charts are prepared based on the assumption that the net asset value and the index value are equal to 100 at the starting date of the chart period. Returns are calculated net of the taxes applicable to the average retail client classed as a natural person residing in Belgium and the tax regime in question applies to this type of person.

Note concerning the swing pricing (Source: Amundi group)

Sub-fund eligible for swing pricing: Yes

To protect the interests of existing shareholders, a Swing Pricing mechanism with a predetermined trigger threshold may be applied. Thus, when the net balance of subscriptions-redemptions for all shares exceeds a pre-determined threshold in absolute value, the Net Asset Value will be adjusted. Consequently, the Net Asset Value will be adjusted upward (or respectively downward) if the balance of subscriptions-redemptions is positive (or respectively negative).
